# **Huge Himalayan Footprints**

My mountain climbing group organised a trip to the Himalayas last year. On the last morning, a friend and I were exploring the area when suddenly we saw some huge footprints in the snow! They looked like human footprints but they were twice the size of my footprints. We were frightened! We ran back to the campsite and told the others. Who made those footprints? The others said it was probably a wild animal or a monster, but I don't think so.
